EUROMASTER VINIFERA 2019 : VINIFERA

The Euromaster Vinifera, MSc in the field of vine and wine, is currently enjoying a high international reputation among the stakeholders of the professional sector. This innovative programme is managed by the European consortium 'EMaVE', in association with international universities, organisations and private companies recognised for their expertise in this field.

Labelled as a success story by the European Commission since 2015.

The programme offers an innovative curriculum that meets the needs of academic institutes and international companies. All students benefit from the expertise of professors from recognized international universities in the vine and wine sciences, and reinforce their knowledge through daily exchanges with their classmates coming from around 20 different countries.

In the end, these young professionals acquire international management skills, linked to their global flexible vision and **cultural intelligence!**
